# The Clean Energy Economy New Hampshire

**New Hampshire has a small but growing piece of America's clean energy economy.** The Granite State is one of just a few states where total jobs grew faster than jobs in the clean energy economy between 1998 and 2007. New Hampshire's share of the clean energy economy may increase, however, following the release of a climate action plan by the state's Climate Change Policy Task Force in March 2009; the plan aims to reduce greenhouse gas emissions to 80 percent below 1990 levels by 2050.<sup>1</sup> Additionally, the state attracted nearly \$67 million in clean technology investment through venture capital funding in the past three years.

## BY THE NUMBERS, THE CLEAN ENERGY ECONOMY:

Jobs (2007): **4,029**

Businesses (2007): **465**

Venture Capital Funds (2006-2008)\*: **\$66,917,018**

Patents (1999-2008): **74**

## EXAMPLES OF COMPANIES:\*\*

**Brayton Energy**, *Hampton* (Clean Energy): researches and develops advanced energy generation technologies

**Segway**, *Bedford* (Environmentally Friendly Production): designs and manufactures battery-powered personal transportation
