Proposal for a

**COUNCIL REGULATION**

**amending Regulations (EC) No 51/2006 and (EC) No 2270/2004, as regards fishing opportunities and associated conditions for certain fish stocks**

(presented by the Commission)

## EXPLANATORY MEMORANDUM

Council Regulation (EC) No 51/2006 fixes the fishing opportunities and associated conditions for certain fish stocks and groups of stocks applicable in Community waters and for Community vessels, in waters where limitations in catch are required for 2006. Amendments of the Regulation are required following decisions recently reached as a consequence of international Agreements and the need for technical clarifications:

1. A prohibition to fish for, to retain on board, to tranship or to land Basking Shark and White Shark in all EC, non EC and international waters should be introduced in the light of international obligations to conserve and protect these species.
2. On 20 February 2006 the annual fisheries consultations on mutual fishing opportunities for 2006 were concluded between the Community and Iceland. The necessary measures should be taken to implement the results of the consultations in Community legislation.
3. The definition of days present within an area as regards fishing effort for vessels in the context of the recovery of certain stocks should be clarified to ensure the correct application of fishing effort limitations.
4. The presentation of the use of certain types of fishing gear without special conditions in respect of the maximum days a vessel may be present in an area in the context of the recovery of certain stocks should be revised.
5. There should be an incentive for vessels operating under a system of automatic suspension licenses to use more selective gear in the North Sea. This should be reflected as regards the number of allocated days present within an area.
6. It is necessary to clarify that when more than one grouping of fishing gear is used during the year, any one of those gears cannot be deployed if the total number of days spent at sea already exceeds the number of days laid down for that gear.
7. Vessels fishing in the context of the recovery of Western Channel Sole stocks should be able to benefit from the derogation as regards the maximum number of fishing days under special conditions. Those rules should therefore be clarified.
8. Due to the modification of the definition of days present within an area, it is necessary to clarify the derogation applying to hailing requirements as regards fishing effort for vessels fishing in the context of the recovery of Western Channel Sole stocks.
9. The North-East Atlantic Fisheries Commission (NEAFC) made a recommendation in February 2004 regarding vessels having engaged in illegal, unreported and unregulated (IUU) fisheries. In May 2006 NEAFC made a recommendation to amend the provisions regarding IUU fisheries. Implementation of that recommendation in the Community legal order should be ensured.

10. Poland is entitled to a herring quota in zones I and II in accordance with Annex XII to the Accession Treaty and has furthermore been allocated licenses to fish for Saithe and cod in Norwegian waters in zones IV and II. This should be reflected as regards quantitative limitations of licences and fishing permits.
11. Some drafting improvements have been made.  
  
Council Regulation (EC) No 2270/2004 fixes the fishing opportunities for Community vessels for certain deep-sea species in 2005-2006.
12. Pursuant to consultations between the Community and Norway on 31 January 2006 and based on scientific advice, the fishery for roundnose grenadier in zone III, including Norwegian waters, should be restricted to the average catch in the period 1996-2003. This amendment should be implemented in Regulation (EC) No 2270/2004.

The present proposal intends to introduce the necessary amendments to:

- Articles 5, 7, 10 and 13 of Regulation (EC) No 51/2006, and its Annexes IA, IB, IIA, IIB, IIC, IID, III and IV.
- the Annex to Regulation (EC) No 2270/2004.

The Council is requested to adopt this proposal as soon as possible in order to allow fishermen to plan their activities for this fishing season.

- (3) Pursuant to consultations between the Community and Iceland on 20 February 2006 an arrangement was reached on quotas for Icelandic vessels to be fished from the Community quota allocated under its Agreement with the Government of Denmark and the local Government of Greenland by 30 April 2006, and for Community vessels fishing for Redfish in the Icelandic Economic Zone to be fished between July and December. Where the master of a vessel or his representative notifies the use of more than one of the groupings of fishing gears defined under point 4, the total number of days available during the forthcoming management period shall be no more than the arithmetic mean of the days which the vessel is eligible for each gear, rounded down to the nearest whole day. It shall not be permitted to change from one gear to another if the total number of days already spent at sea using any of the gears notified equals or exceeds the number of days laid down in Table I for the gear to be deployed in the area concerned."

(g) Point 17.4 is replaced by the following:
